OBJECTIVE

A results-driven MERN (MongoDB, Express.js, React.js, Node.js) and Next.js developer with **two years** of experience in full-stack web development. Skilled in designing and implementing **scalable, high-performance** web applications with a strong focus on user experience. Seeking a challenging role to leverage my expertise, contribute to dynamic projects, and continue growing in the field.

Education

Master of Computer Application *Pursuing*
Indira Gandhi National Open University

Bachelor of Computer Application *December 2023*
Indira Gandhi National Open University

Bachelor of Commerce *June 2022*
School of Open Learning, University of Delhi

Experience

MERN / Full Stack Developer *Super Plastronics Pvt Ltd* *Delhi, India 2022 – Present*

- Designed, developed, and implemented software applications for websites based on analyzed requirements and industry technical standards.
- Created and integrated production APIs for Bajaj, Snapmint, Ekart, and other third-party services to enhance platform functionality.
- Tested programs and databases to identify issues and make necessary modifications.
- Collaborated with team members to troubleshoot issues, apply best practices, and optimize system performance.

Frontend Developer *Reliquis Consulting* *Delhi, India 2021 – 2022*

- Translated Figma designs into pixel-perfect web interfaces using HTML, CSS, and JavaScript.
- Developed visually appealing and responsive websites with a focus on WordPress design and customization.

Web Designer *Webside99* *Delhi, India 2020 – 2021*

- Converted Figma designs into functional web pages with pixel-perfect precision using HTML, CSS, and JavaScript.
- Developed websites using HTML, CSS, JavaScript, and jQuery while ensuring adherence to SEO best practices for optimal visibility and performance.

Projects

Bajaj Serial Mapping

- Developed APIs for serial mapping, enabling Bajaj to efficiently verify the availability of serial numbers for purchase and finance.
- Streamlined the process to ensure accurate tracking and inventory management.

SPPL Services

- Built the backend for SPPL Services, allowing customers to register products, raise complaints, and make service payments.
- Improved customer service efficiency with a structured support system.

SPPL Services Dashboard

- Developed an internal tool for the in-house service team to manage customer complaints and process service payments.
- Implemented extended warranty processing and service tracking for better workflow management.

SHOPSPPL

- Developed an eCommerce website offering home appliances such as TVs, washing machines, ACs, and coolers.
- Enhanced user experience with optimized product navigation and purchase processes.

SPPLEkart

- Integrated Ekart logistics API for order fulfillment on both native and WordPress platforms.
- Optimized the purchase order process, improving operational efficiency for in-house logistics.
